THE FOREIGN NEWS.

There is no disguising the nature of the foreign news by the Nova Scotian at Porthind yesterday, a brief abstract of which spears in our dispatches. These indications may not be mistaken, nor will the powers are beginning to argue that it is a de facto independent nationality, and a successful revolt, which has held the Fedchil arms at bay for these long months past. These nations of Europe are about to ask of our Government a report of its progress in subduing the rebellion thus far, of rather, they are well nigh ready to act on the report already presented. Is the Covernment satisfied with what it has done? fire the loyal people gratified at the leggarly account of successes that have abliowed the lavish outlay of men and rioncy? This steamer's news finds the lighest legislative body of the nation still alguing whether it shall expel a convicted nitor who comes like Cataline into the zot yet had the courage and firmness to glass a Confiscation Act. It finds Washington filled with traitors, in government pay, whom neither Cabinet officers for the Administration have yet had the firmor the Administration have yet had the firmness to root out and punish or even banish. I had every movement made by our army ugainst the enemy languishing from the dread that slavery may sufer equally with the rebellion. Finds the record of 1861 completed without one single vigorous some firmst at the heart of the rebellion, from the same potent influence. Finds west Point commanders coquetting with the rebels and nigger catchers in Kentucky and on the Potomac. Finds a greater con-Chattelism shall remain infact, than that the burdens and hardships imposed by this war on the people of the loyal States should be lightened. Finds all these. Are we arepared to withstand any verdict that may be based on these findings?

and breaking the blockade. This speech attracted some attention.

The Loudon Tenes, in an editorial upon it, says, "Let France interfere it she likes. England's true policy is to suffer a little longer, and let the event work itself out. It will not be long. It may be, indeed, doubtful whether our interference would not rather retard than hasten the desired event of open ports and a large supply of cotton. Let us, then, pursue an honest policy by standing quite aloot."

The Manchester Guardian argues in a somewhat similar strain, and, as regards the cotton supply, it says: "It is a question how far in this district the prevailing distress is due to the civil way in America, and whether it is not as much attributable to over-production as mere dearth of cotton." MAY SLAYES FIGHT FOR THE UNION?

We have never seen the affirmative of this question so clearly stated as in the speech of Hon. A. G. Riddle, of Ohio, before the House of Representatives, last week. He shows conclusively that Congress, as the law-making power of the nation, has ample authority under the Constitution to enroll gevery slave fit to bear sims, in the service of the Government, side employ them to put down domestic in Times, but yet discourses thus: "The exploand employ them to put down domestic in-surrection, repellforeign invasion, or aid the National Government in any other way that may require military assistance, precisely as other classes of "persons," hot aliens, may be obliged to render military service. We think that the arguments and conclusions of Mr. Riddle are unanswerable, at least there is no man in Congress who can successfully rebut them.

It is no answer to alledge there exists no answer to alledge there exists no answer to alledge there exists no fine the slaves of the state of the slaves and a content to see the night reduced the war after having adopted, perhaps rather precipitately, the course of conduct which might render it inevitable. Englished oses not hold merely the language of eatief of antional pride; she breaths hard as a man who feels that a terrible weight has falled off his breast. The Morning Post, indeed, affects a little diplomatic coolness and indifference; but the Times does not trouble itself about excuses, and content to see the night-about excuses, and content to see the nig

lefense of the Union; that is not the statissue. Mr. Riddle does not assert mare of a maritime war dissipated, is altogether disposed to. deny that such necessity has yet arisen; but the point he makes so successfully is, that Congress can constitutionally authorize the enrolling and organizing of colored persons, bond or free, as part of the militia of the nation. He conclusively shows that the same power that can oblige the father to give up his minor son or the master his mation of the act would lead to the belief in Europe that the reconstruction of the Union was considered impracticable. He also stated that after the design was carried out, he sent another dispatch to Washington deploring the course which had been pursued, and expressing strong hopes that the proceeding would not be repeated at any other port.

The London correspondent of The Manchester Guardian says: "It is no secret that the South has its active and infelligent agents in London, as well as its 'officiously' recognized envoys, and that they are straining every acrecomplexion or his descent; no matter nglo-American; or whether his master be his father, he is a "person" in the eye of the Constitution, in a military point of view, and must fight for his Government f drafted. There are six hundred thousand men in the military service of the Government, not one of them was drafted or obliged to join the ranks; they are all volunteers who tendered their services in defense of the Union. But who will contend that Congress could not have anticology the Peast.

Referring to the state of health of Gen.
Anderson, the New York World says his physicians have ordered him for the present to
avoid all undue mental excitement. He is not the service or labor they may owe, under State laws, though their masters be rebela. They are simply performing a Constitutional obligation, and when they are discharged from the service of the Government, their former obligations are renewed. Because a debtor joins the army or is drafted into it, he is not thereby absolved from the payment of the obligation when he returns home. Neither is the apprentice or minor discharged from performing the remainder of his service to his nester or parent in consequence of serving a campaign on business even of the simplest nature possi-ble; consequently he is living with his family in the utmost quiet at the Pitth-avenue Hotel, occupying rooms in the most retired part of the building. mainder of his service to his master or parent in consequence of serving a campaign in the army. Emancipation rests upon different grounds. Congress has the power, under the Constitution to punish traitors. Laws may be passed authorizing the seizure and conflication of the property of the rebels, in punishment for their crime of treason. Slaves of rebels may, in this way, be confiscated and set free. They can be absolved from ever more serving their traitor masters, as a penalty inflicted for the hideous crime. We do not see how these propositions can be successfully traicountry.

Philadelphia papers of the Istannounce the receipt of the pardon of Judge Vondersmith, convicted in 1850 of forging applications for pensions, and sentenced to pay a fine of five thousand dollars and to undergo an imprisonment of twenty years. Before the explinition of President Buchanan's term of office he commuted the sentence to three years, which would have expired in May next. The pardon of President Lincoln is unconditional, and relieves him from the payment of five thousand dollars. Since the lucarceration of thousand dollars. Since the incarceration Vondersmith, his wife has died, and this urged as a reason for his pardon.

And yet, be-hold the New World bringing its contingent to the general viclasitudes. From beyond the Atlantic has been raised a ficree cry of war, Andy Johnson, the gallant and loyal Senator from Tennessee, declared in Washing-ton, that "rebels should be stripped of all probable issue by the Government of two hundred and fifty millions of Tressury notes, will, added to the currency furnished the country by the banks, produce the results which all patriois and wise fluanciers must deprecate.

The problem presented then, is this:

The issue of Treasury notes being a fixed of democratic institutions! But, at the same decretical decorate upon a scale that surpasses all the proportions of the allowed to own anything." The Transurs preaches the same decretic, and the Journal spectacle for those who love to cite the example of that now peon by developing themselves beneath the shade of democratic institutions! Baber is the individual who published the Doughas and Lincoln debates, and put the ball in motion that finally landed Uncle Abraham into the White House. Baber, hence, claims to be Warwick, the Kingmaker, and for his services has been rewarded with the office of Paymaster in the United States army.

When the President appointed the Major to his position, he desired him to call upon the Secretary of War and receive his commission. Now Cameron is besieged and hunted by hundreds, and is hard to reach. Baber stood at the gate for a long while; the hours wore away, and no attention was paid to his appeals by the sentry at the door.

Finally, Baber—who had for long years warred Chase—concluded to call upon that functionary to assist him, on the principle that Chase is always willing to do more for his enemies than his fireds. The Governor went with Baber at his side, strode hito the War Department and up to Cameron.

Davis can look with pride on the astonishing vitality of the negro in his own State, as compared with the white race, despite flogging, overworking, underfeeding and the other drawbacks to rapid increase. In Texas the whites have increased at the rate of 175.58 per cent, and the slaves 210.66 per cent. In Arkansas the whites have gained at the rate

per cent., and the slaves 210.06 per cent. In Arkansas the whites have gained at the rate of 90.88 per cent., and the slaves 125,89 per cent. In Tennessee, whites 9.25 per cent.; slaves 15.17 per cent. Alabama, whites 23.46 per cent.; slaves 34.47 per cent. North Carolina, whites 14.19 per cent.; slaves 14.74 per cent. Georgia, whites 15.48 per cent.; slaves 21.10 per cent. In South Carolina there seems to lave been an exportation of slaves for the lucrosea since 1850 has been of slaves, for the increase since 1850 has been of slaves, for the increase since 1850 has been only 4.59 per cent, while the white have increased 6.21 per cent. The population of this "sovereign stock," which Gen. Sherman is protecting, consists of 291,635 white, 462,541 slaves, and 9,648 free blacks. In Louisiana the increase of whites and slaves has been about equal—39.98 of the former, and 36,03 of the latter. Leaving out the city of New Orleans, which contains one-paif of the white leans, which contains one-half of the white leans, which contains one-half of the white population of the State, and very few slaves comparatively, the ratio of increase is about the same as that of Mississippi, which contains no large cities direction immigration from the Northern States and Europe. Who shall say that the negro is not a responsible creature, when he gives such evidence of thritt in increasing, multiplying and reclamations to the first state. such evidence of thrift in increasing, multiplying and replenishing the Gulf States of North America? The seven States of South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana and Texas, contain 3, 262,050 whites and 2,12,346, slaves—the former increasing at the rate of 48.66 per cent. in ten years, and the latter at the rate of 56.47 per cent. When we reflect that the laws of nature favorable to a rapidly increasing population, are all on the side of the whites and distant, at Headquarters. When the news of the disaster to Burnside's wretched hulks reached Washington, the nomination of Assistant Secretary of War Tasder was recalled by the Senate, it being understood that he had something to do with the purchase or chartering of the said hulks. He will now be "hung up" for some time.

Convention Usurpers.

It has ever been a subject of painful con-templation to consider the fact, that when men of good sense and judgment in their busi-

nemselves; and who—except he be a mem-er—does not have this feeling intensified then he considers the antics of our Constitu-onal Convention? 'Their acts, so far as they

have proceeded, have been in utier subversion of law and order, particularly in settling their powers and prerogatives. It would seem that any one who had ever heard of a republican

During the past week the tide has set very
strongly against Bright, and it now seems almost certain that he will be expelled. I There

the retention of Bright, it would be a proper

Dispatches from Gens. Lane and Hunter have been received at the War Department. Each claims the right to command the expedition to the Gulf, and Gen. Hunter asks for \$5,000,000, which Gen. Lane says he (Lane) can do without. Gen. Lane's fiends here do not credit the dispatch from Leavenworth. Therefore he was for fixing the thing so that, we could give him just what he needed and then the him up, so tight that he needed and then the him up, so tight that he could not get any more for all time to come. Thus far shall thou go Samuel, and no farther; here shall thy seductive way, the ways of thy seductive family be stayed. He knew the old man Casey and respected them. His daughters he had never had any sequalizance with. But all the maie Casey's were good fellows, the best of fellows. But he was willing to make forms with them once for all and then quit.

Mr. Edwards of Sangamon was opposed to the vialt's a slow were several other guntlemen.

Mr. Edwards of Sangardon made a lengthy speech upon this subject. He supported Mr. Wentworld's menudment, and was extremely radical upon the bank question.
